

Connecting to the Internet - Windward

To access the internet at the Windward Industries site you will need to connect your device (Phone, Laptop, Etc.) to the site's wireless Nighthawk modem's Wi-fi network.

The current Wi-fi password and network name can be found on the modem (pictured below).

If you are unsure where the modem is located, ask your supervisor or manager.

To connect to the internet follow the below steps:

1. Quickly press the power button on the modem to wake the screen
2. Select the Wi-Fi name shown on the modem's screen in your device's Wi-Fi settings
3. Enter the password as displayed on the modem's screen
4. After a short moment you should be connected to the WiFi network

If you are connecting with a smartphone, you may be able to scan the QR code to connect (if your phone supports this).

To connect via QR code follow the steps below:

1. Quickly press the power button on the modem to wake the screen
2. Tap the QR code icon on the modem's screen below the battery icon (pictured below)

3. Open the camera on your smartphone
4. Scan the QR code that is displayed
5. After a short moment you should be connected to the WiFi network
